medes, Miss., Nov. 18.-President posevelt's bear hunt in Mississippi is ded, and he has not had even a shot at a bear. The last day of the chase simply a repetition of the three eceding days, so far as his luck was concerned. Try as the hunters would, they could not get a bear within range of the president's rifle.

The dogs caught a fresh trail this rning, and the president and Holt lier followed it half a dozen miles to Big Sunflower river. The bear sed a mile below the ford they went and believelng it was making for the ebrake on the other side, they en-vored to head it off. When they got the brake, however, they were dis-ted to find that the bear had douon his tracks and crossed the river further down. MESSENCER CETS

Trinidad, Colo., Nov. 18 .- Four masked robbers held up passenge train No. 7 on the Colorado & Southern road 12 miles south of here today. One of the robbers was shot by Express Messenger H. W. Sherwick of Fort Worth, Tex. The robbers flagged the train, and as it slowed up they ran alongside of the engine and covered the crew with revolvers. They then compelled the engineer, John Guilfril, to alight, and after placing a cask with dynamite under the baggage car and attaching a fuse to the explosive, they rdered Guilfril to ignite the fuse. This he attempted to do several times, but for some reason the fuse would not burn. During this proceeding the robbers kept up a fusillade of shots in the direction of the train for the purpose of intimidating the passengers.

While they were preparing to rear-range the dynamite and fuse, Messenger Sherwick, after extinguishing the lights in his car, quietly opened a side door in the car far enough to admit a gun barrel and fired at the nearest robber. The latter fell in his tracks. His startled companions picked him up and quickly disappeared in the woods nearby. None of the passengers was molested. The sheriff of Las Animas county immediately organized a posse and is now in pursuit of the hold-ups.

to suffer; and think of the time consumed. We doubt whether these experiences tended to lengthen their lives. It is just so with hundreds of other things. A great improvement is announced. We marvel at it for a few days, and then accept it as a matter of course. Now, if it is necessary to go to some distant city, we are made as omfortable, if not more so, than though few hours brings us, without fatigue, to our destination. There is not a man living who would prefer the old way, after he has experienced the delights of

There are many good things much more vital to the ultimate good of man than easier methods of going from place to place, and nothing, probably, will illustrate this better than the much-talked-of Vinel, for in Vinel we see what has formerly been a necessity, attended with the most disagreeable features. transformed into what is really a lux-

In Vinol we have the elements of what has been the greatest medicine what has been the greatest incidence known to man for the cure of wasting diseases of every description, namely, cod liver oil; but in Vinol we have none of the objectionable features that attended cod liver oil.

of our city, who has connected himself with the Boston firm of chemists producing these goods, will tell you, and as many other druggists in town would endorse him, Vinol is the essence of all that is good in cod liver oil. Vinol is not a patent medicine; hence its popularity with physicians as well public. The manner of producing Vinol s a new discovery. It is the result of a special process by which the curative and medicinal elements are extracted from the liver of the live cod, leaving

behind the fat and grease.

Just the right proportions needed of this extract is dissolved in a delicate table wine, and so today, in the line of medicine, all who have found it neces-sary to take cod liver oil, may do away with all the disagreeable features of the old way, discarding the horrible grease which may be likened to the lumbering and unhealthful vehicle of travel of the past, and take instead, as Mr. Druehl him self, in speaking of the matter, described it, "the elegant and modern vestibuled train" of medicine. finding in Vinol the elements so much needed to restore health, entirely disguised and much more rapid and effi-cient in the manner that they operate, than could have been expected in the old and cumbersome way in which this valuable remedy was formerly taken

which it was declared no life boat could live, the globe was towed by a tug from Dover harbor into the channel. In order that the apparatus should be as near as possible in the same condition as it would be if used in case of shipwreck, it was weighted with sand bags, which, with four men who were in the globe, made the weight equivalent to that of twenty men and

tremely high and a sea was running in

thirty days' provisions.

The Globe, without its crew, was first towed out to sea, between Dover and the South Foreland.

The strong wind raised terrific seas. Several times the tug was caught in the trough and her decks were completely swept, so that it was necessary to batten down all the hatchways. But the globe rode over the waves like a cork, Finally, it was towed into quie water where Capt. Donvig, accom-panied by three Dover seamen, went aboard. They fastened the manhole and the globe was again towed to sea. When the full force of the wind and seas was experienced, Capt. Donvig

signaled through the manhole to cast off the tow rope.

The globe, left to itself, bobbed about in the heavy seas, but showed no inclination to roll over.

After tossing about for ten or fifteen minutes, Capt. Donvig and one of the sailors emerged from the manhole, and, ashing themselves to the outside globe, set a small sail which they pulled through the manhole with them. The air funnel was used as a mast and

wages are falling. Leicester is more fortunate than Northampton, since it has the hosiery industry, which has not been seriously affected by the increased production abroad, but it has a large working force of shoemakers, now menaced with loss of employment.

Northampton is in a sorry plight from the shrinkage of business. The fortunes of these towns might have been retrieved if the shoe manufacturers had kept abreast of American enterprise and equipped their factories with labor saving appliances.
